

# Data Vortex Round 1 - EDA Report

Team Name: LucknowiNababs

Members: Mayukh Sarkar, Chitranshi Singh

## Exploratory Data Analysis Insights:

- \* Data Integrity: The dataset merged 12,360 posts. Missing categorical values (platform, text) were imputed with 'Unknown' and 'No Content' to prevent data fabrication. Missing numerical values (likes) were imputed using the dataset median to preserve the original distribution.
- \* Platform Trends: YouTube and Facebook are the most active platforms, with 2,136 and 2,135 posts respectively.
- \* Engagement: Facebook drives the highest average engagement (2,330 likes per post), despite volume being nearly identical to YouTube and Twitter.
